

Previously known as: ChemTek™ 38-520

## Chemical-resistant butyl gloves, protecting wearers against aggressive hazards in comfort

- **Specialized protection:** AlphaTec® 38-520 industrial gloves offer superb protection against harsh chemical hazards, such as aldehydes, ketones, esters and concentrated mineral acids
- **Reduced allergy risks:** Latex-free by design, these butyl gloves eliminate latex allergy risks
- **Improved ergonomics:** AlphaTec® 38-514 protective gloves are also comfortable, with a naturally curved shape and soft feel, improving workplace safety while making donning and doffing easy
- **Enhanced flexibility:** In addition, their soft butyl formulation heightens their flexibility and dexterity
- **Strengthened grip:** These flexible work gloves also feature a rough finish around the hand area, reinforcing grip performance, for more secure, confident handling

### Industries

- Life Sciences
- Oil and gas
- Chemical

### Applications

- Chemical Handling
- Opening and draining pumps valves or lines
- Filling, blending and charging of raw materials
- Equipment repair & maintenance

Previously known as: ChemTek™ 38-520

### Performance Profile

### Key Features

- **Butyl polymer:** Resistance to harsh chemical hazards\*
- **Latex-free formulation:** Latex allergy risks eliminated
- **Ergonomic design and soft feel:** Fitted comfort, ease of use  
\*including aldehydes, ketones, esters and concentrated mineral acids

### Performance Standards
